PROFESSIONAL SUMMARY

I am a Full Stack Developer specializing in AI-powered applications and scalable backend systems with hands-on experience building production-ready web platforms and automation solutions. I am skilled in React, Next.js, Django, FastAPI and Node.js with hands-on experience in integrating LLMs, designing APIs, and developing automation pipelines. I enjoy building clean, scalable solutions across AI systems and web applications.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, TypeScript, Java
- **Frontend:** React.js, Next.js, Tailwind CSS
- **Backend:** Django, FastAPI, Node.js
- **Databases:** PostgreSQL, MongoDB, MS SQL Server
- **AI/ML:** LLMs, LangChain, FAISS, Hugging Face, NLP
- **Cloud & DevOps:** AWS, Docker
- **Automation & Scraping:** Selenium, Puppeteer, Playwright, UiPath
- **Tools:** Git, GitHub, Power BI

WORK EXPERIENCE

Freelance Software Developer (AI & Full Stack)

Oct 2024 – Present

- Built an AI-based property valuation system by training machine learning model to generate an accurate prediction.
- Developed automation pipelines for web scraping and data processing to streamline data workflows and reduce manual effort.
- Designed and deployed multiple full-stack systems using React, FastAPI, Node.js, and PostgreSQL.

Robotic Process Automation (RPA) Developer

Sep 2022 - Oct 2023

DHL APSSC, Kuala Lumpur, Malaysia.

- Automated processing of 3,000–5,000 PDFs daily, improving efficiency by ~60%
- Managed high-priority, critical support tickets and ensured timely resolutions.
- Designed and developed end-to-end automation solutions for various business units using UiPath.
- Led TAT, UAT, and country-level deployments to ensure successful rollout of automation projects.
- Created interactive Power BI reports to support data-driven decision-making and business insights.

Web Developer (Internship)

Jan 2022 - Aug 2022

HomeCrowd Sdn Bhd, Kuala Lumpur, Malaysia

- Assisted in testing and debugging a Laravel-based system to enhance performance and stability.
- Modified and introduced significant UI changes and new features to enhance user experience.
- Contributed to planning and development of Web3 projects leveraging smart contracts.
- Assisted in maintaining and updating technical documentation to ensure accuracy and consistency across development phases.

EDUCATION

Bachelor of Computer Science and Information Technology

2019 – 2022

Specialization in Computer System and Network

Universiti Malaya, Kuala Lumpur, Malaysia

PROJECTS

AI Property Valuation Platform

Technologies: React, FastAPI, PostgreSQL, Machine Learning.

- Developed an AI-based system to estimate property values using structured data and predictive modeling.
- Built scalable backend APIs and integrated frontend for real-time valuation insights.

Shop Local (AI-Powered E-commerce Platform)

Technologies: React, Django, PostgreSQL, LangChain, LLMs

- Built a full-stack e-commerce platform with AI-driven product recommendations.
- Integrated LLM-based chatbot and personalization system for improved user engagement.

AI Learn (AI Learning App)

Technologies: Next.js, FastAPI, PostgreSQL, LLMs

- Developed an AI-based learning tool for practicing technical quizzes with automated summary and feedback.
- Integrated smart study planner based on learning goals.

LANGUAGES

- English Proficiency - Professional
- Bengali Proficiency - Native
